Boxes are packed with carefully selected baby plants (plug plants) delivered direct to you, ready for immediate planting. Within an hour you can be growing your own organic vegetable or flower garden.

Rotters have developed a range of boxes to suit almost any taste or garden size. Our current range includes herbs, vegetables and flowers, so there's no reason why you shouldn't have a go!

We have done all of the hard work in producing your plug plants. This means you don't have to do any of the sowing, germinating or suffer any disappointment when things don't grow.

Our baby plants arrive alive and growing in organic compost, so all you have to do is make a hole and drop them in. This really is the easiest way to start producing your own delicious home grown food.
